

ENERGY & EDUCATION CONNECTED

Our business is backed by electricity generated from renewable sources.

We certify that Durham University has 100% of its electricity supply from EDF backed by **Clean Technology Renewable Energy**.*

April 2021 to March 2022

A handwritten signature in black ink, appearing to read 'R Hughes'.

Rich Hughes
Director of Sales and Marketing

*Electricity generated from any combination of natural sources, such as wind, solar and hydro, which will be evidenced by REGOs.

All source certification meets GHG Protocol Scope 2 Guidance Quality Criteria. This is not a REGO certificate. REGO certificates are held by energy suppliers for Fuel Mix Disclosure. The low carbon electricity that we buy for Renewable tariffs and products is supplied into the National Grid. Customers receive that electricity through the National Grid, not directly from low-carbon generators.

The Carbon Trust has assured that the electricity supplied for the year ended in 31st March 2020 under the following products – Renewable for Business, Select Renewable, Clean Renewable and UK Renewable – all of which are under the umbrella of the “Renewable tariffs” is 100% covered by Renewable Certificates that have been obtained and retired by EDF, in line with the WRI GHG Protocol Scope 2 Guidance (2015).

*100% of the electricity supplied is renewable, backed by certificates of renewable energy guarantee of origin. Emission factor compliant with the GHG Protocol Scope 2 Guidance and to be used for the 'market-based method'.
