Content:

This module involves a partnership between a student's training institution and a given placement context which enables students to encounter, and work effectively within, such a setting and reflect creatively upon it.

It provides opportunity to enhance skills in understanding and analysing context, and integrating theological enquiry with pastoral / ministerial / professional practice. It draws upon the resources of Scripture and relevant Christian traditions in critical conversation with insights from other sources, including the social sciences. It demands of students attentiveness to their own assumptions and biases. Reflecting upon their placement, students will take responsibility for identifying key aspects, encounters and themes out of which to develop work for assessment.
